

CMS (Classes Management System)

This product manages entire Classes Management in one application such as admission, fee management, attendance etc.

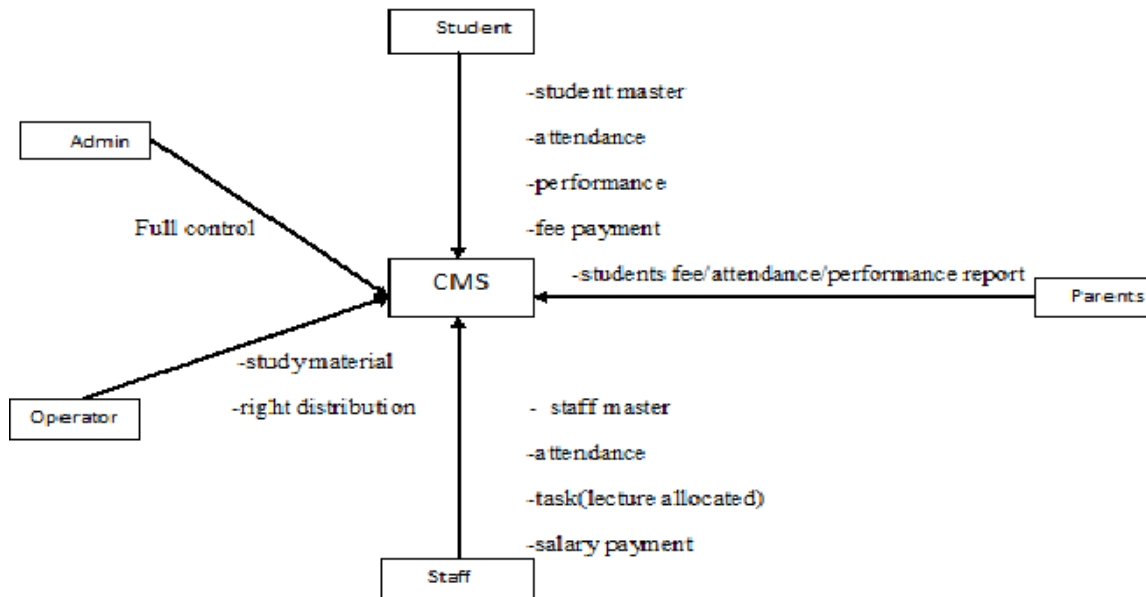

- CMS software is developed on latest technologies to fulfill latest technical requirements of clients.
- This is a comprehensive software solution to manage all facets of your Educational Institute.
- Smart Card/RFID technology can be implemented along with this system for Admission, Attendance, Fee, Library, Exams etc.
- SMS Facility to update Parents about their ward.
- Admin Right for Class Administrators.

Our Proposed Modules:

- Student management
- Staff Management
- Parents Management
- User Management
- Admin Management

CMS architecture:

CMS architecture:

Student management:

- Enquiry about admission can be made using CMS.
- This enquiry can be used for student profile data when student takes admission.
- Student fee management is done by application.
- Student attendance is managed by application with the help of biometric; if ward fails to come then message would be sent directly to parents.
- Student test details can be saved and report card performance report can be generated with the help of CMS

Staff management

- CMS maintains staff master.
- Staff task allocation would be done by CMS
- Staff attendance is maintained with the help of biometric device and CMS.
- Staff payment would be generated with the help of CMS according to number of lectures taken.
- Nonteaching staff's master and payment generation would also be done by CMS

Parents Management

- Student's fee, attendance and performance report is maintained in parents section.

User management

- Right distribution can be done in CMS
- Admin login have full control of CMS and other user login with their specific access rights can access different modules.

Tools

- We have also provided add- on such as syllabus tracker, attendance tracker, calc and notepad etc as direct link in CMS itself.

Salient Features

- Complete integration on single platform
- Secured and specific user access
- Internal Audit System and Flexible reporting capabilities
- Customizable System
- **Export** Future-readiness
